- Extra electrical pedals
- Control bar option to replace pedals

Optional electric back rest

SKF 8000N motor with two pedals

Opus V Bobath tables are entirely designed and fabricated in Quebec, Canada

Features of interest

The Bobath table uses a reinforced OPUS V base, fabricated from welded steel tubing and is powder painted to a beautiful mushroom beige colour. The wooden base of the mattress is made out of imported 9 ply Russian plywood, and covered with two inch (2") thick high quality foam and then finished with a hospital grade black vinyl. The table rises from 18" to 36" with a foot pedal. An optional control bar that is placed on either side of the table to eliminate foot pedals can be supplied as an option. The table can lift 350 lbs with a rapid electrical actuator rated at 8,000N and operates on 110 volts.

Standard table size is 42" x 77", with multi directional wheels on one end and fixed direction wheels on the other end.

Tables can be ordered with or without back rests.

Special tables with inclinable head rest can be supplied on demand.
