

ERGO Table

Ergo table (S) : Static/fixed work cell with levelling pads

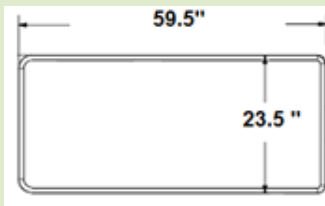

Ergo table (M) with multi directional wheels

Ergo table (W) with lockable wheels

Options for the table

- Custom table top size
- Food grade table top
- Metal top for welding applications
- Multi directional wheels with locks
- Table base with levelling pads for uneven floor
- Minimum table height starting at 14 inches with a shorter actuator
- Rechargeable battery pack for powering unit

Melamine beige table top

Control bar for height adjustment

10,000N electric actuator

Techno Vogue Inc., tables are entirely designed and fabricated in Quebec.

Features of interest

The ERGO table uses the econo osteo electric base for easy access to objects placed on the table top.

The table is fabricated from welded steel tubing and is powder painted to a beige colour.

The table top is a 5/8 inch thick composite of beige melamine bonded to a highly dense 9 ply cherry wood from Russia. Other table tops for food grade use can also be supplied on demand.

The table rises from 18" to 39" with a control bar that is placed on either side of the table. The table can lift 350 lbs with an electrical actuator rated at 10,000N and operates on 110 volts.

Some applications for Ergo tables

- Mechanical assembly
- Maintenance shops
- Wood working
- Moving heavy objects
- Construction work
- Work platform for
 - production
 - welding
